

Please don't make any decisions that will change the law in Indiana for telemarketers. Since signing up to be on the Indiana no call list I do not receive unwanted calls that used to disrupt my life. My husband works commercial construction and our hours change quite frequently. As such we get up anywhere from 3:30am to 5:30am and go to be from 7:30pm to 10:00pm depending on where he is working. It was not uncommon for us to loose a nights sleep due to being woken up after an hour or so of sleep and being unable to fall back to sleep. I think the only people who actually buy from telemarketers are the elderly. This is another problem that this has eleminated for me. I signed my 77 year old mother up for the list and I don't have to worry about someone calling her and scamming her for money. Now if she get a call with someone sellilng something she tells me and we report them immediately.

Again, please don't make any decisions that will change Indiana's No Call list.
